Online Learning Gateways

The Gateways to public digital learning are a global initiative to ensure that every learner, teacher, and family can easily access, find, and use high-quality and curriculum-aligned digital education content to advance their learning.

Launched by UNESCO and UNICEF during the UN Transforming Education Summit in September 2022, the initiative will:

- ❖ Map, describe and analyze existing public digital learning platforms and content;
- ❖ Help countries create and strengthen national learning platforms;
- ❖ Identify and share best practices;
- ❖ Establish international norms and standards to guide the development of learning platforms in ways that advance national and international goals for education.
